MAKK®

“Architecture is the thoughtful making of space”

Louis Kahn

ABOUT

STUDIO MAKK®

Studio Makk is a multidisciplinary architecture studio established in İstanbul in 2021. Specializing in luxurious architecture and millwork, we are a team of passionate and ambitious architects and engineers. Our expertise combines innovative design with practical functionality, serving various projects, including hotels, restaurants, private residences, and high-end retail spaces.

Architecture

At Studio Makk, we create custom solutions for each project, carefully including every detail from the beginning to the end. Our broad experience managing all project phases, from the first design idea to completion, results in complete turn-key solutions. We see each project as an exciting challenge and work hard to produce spaces of the highest quality that meet contemporary needs and aesthetics.

Project Management

In project management, we prioritize a comprehensive and client-focused strategy. We handle every aspect, beginning with the initial client interview and then moving through time and budget management, planning, implementation, and the millwork. We are committed to delivering a top-notch performance, which includes ensuring that our clients always have a personal point of contact for a customized experience.

Millwork

Understanding and fulfilling our client's needs is key to our approach to millwork. We lead millwork projects from the beginning to installation, providing custom, detailed strategies at each stage. Our background with luxury retail brands and hotels enables us to create the ideal mix of quality and style for every project.

ANT KORALTÜRK

After completing his degree in Architecture and Master's in Project Management from Yıldız Technical University, Ant Koraltürk excelled as a project manager for bank projects. In this role, he advanced his skills and proved his capability in architectural design and project management.

He then shifted into retail, taking a key role as an architect at Kanyon Shopping Mall. Here, he played an important part in renovating over 100 stores, demonstrating his ability to combine high architectural standards with the unique requirements of each retail space. Additionally, he designed and developed projects in line with the demands and needs of the building and its investors.

Expanding his expertise into luxury retail, he successfully led numerous prestigious store and restaurant projects in İstanbul, London, and Moscow, such as Harrods and Nobu.

In 2021, he applied his experience and knowledge to co-found Studio Makk. As a founding partner, he leads projects aligning with clients' custom needs and expectations.

HARUN KÖKSAL

Upon graduating with a degree in Woodworking Industrial Engineering from Hacettepe University, Harun Köksal started a career as a production and project manager in luxury retail and hospitality. For over 14 years, he has been leading and executing the production processes for luxury retail spaces.

His extensive experience includes directing the production of various high-end stores and boutiques in Asia, Europe, the United States, Australia, and the Gulf region. Some of these successful projects include Louis Vuitton, Richard Mille, Galeries Lafayette, Ralph Lauren, Nusret, Michael Kors, and Dolce & Gabbana, as well as 5-star luxury hospitality projects, including Sheraton, Hilton, and Soho House.

In 2021, he brought his experience to co-found Studio Makk. As a founding partner, he adds unique solutions to the production processes and ensures that every detail of the resulting products is of the highest quality.

KAAN MARAL

Kaan Maral developed his skills in various architectural offices while pursuing his education in the Architecture Department at Izmir Institute of Technology. Following his graduation, he began an important phase of his career in Cappadocia, spending four years leading architectural design and restoration projects, especially in boutique hotels.

In 2016, he continued his professional journey in İstanbul. Here, he took on the role of site manager and successfully brought to life a wide array of architectural projects. His portfolio includes diverse ventures such as the renowned Ulus 29 restaurant, several residential and office spaces including the Ara Güler Archive, as well as high-end retail store projects for prestigious brands like Prada, Rolex, Loro Piana, Bulgari, Louis Vuitton, and Gucci.

With his architectural design knowledge and construction site management experience, he co-founded Studio Makk in 2021. As a founding partner, he uses his expertise in design to turn imagined spaces into reality.
